Experience

Nuevera Infotech   **Sept 2023 – Jan 2024**
Web Developer Intern   *Remote*

- Explored and learned **GraphQL,AWS,APIs,Version Control,FIGMA, and Agile Scrum Fundamentals in 300++ hours**
- Worked closely with the backend team to integrate frontend component with RESTful APIs..
- Accelerated Frontend devlopment by 15% through the implementation of streamlined technical problem-solving techniques that I conceptualized.
- Contributed and actively participated with 5% more team engineer in customize the responsive naviagtion bar in website **by updating the CMS and programming.**
- **Gained Knowledge of deployment process to deploy the application on cloud platform like AWS and Microsoft Azure.**
- Built stable and 98% responsive webpage component using **react Material UI** and following **Agile methodology** to design attractive UI
- **Reasearched,investigated,and fixed a wide range of technical issue to increase the process efficiency by 18.**

Bharat Electronics Limited   **July 2023 – Aug 2023**
Internship   *Kotdwara*

- Maintain data entry and accurate timely entries for **updating** the various types of data into database or computer systems
- Reviewing and validating the data errors or inconsistencies to maintain data quality better.
- Identifying and correcting inaccuracies or missing information within the datasets.
- Organized and maintained databases, ensuring efficient storage and retrieval of information.
- **Created and updated documentation** related to data entry procedures and protocols.
- Played an integral role in a team of 4 engineers,while acquiring valuable experience with advance technology including **Git,React.js,DOM,jQuery.**
- Mentored 6 team members, enabling them to achieve professional growth and personal goals.

THDC India Limited   **Dec 2021 – Jan 2022**
Front-end Developer Intern   *Tehri*

- Added job openings section using **HTML,CSS,Bootstrap,React.js,Javascript** to increase the efficiency by 20% after implementation.
- Contributed and actively participated with 5 more team engineers in **feature implementation and programming.**
- Built **responsive and modular templates** using HTML,CSS,Bootstrap, and laravel with 3 other team engineers.
- Gained exposure to working with teams in an **organizational environment** and polished my skill in react.js to 70%.

Education

THDC Institute of Hydropower Engineering and Technology College   Aug 2019 - Sept 2023
Bachelor of Technology in Computer Science   *Tehri,Uttrakhand*

12th Education   April 2017 - March 2018
Baluni Public School,Talla Motadakh   *Bijnor,Uttarpradesh*

10th Education   April 2015 - March 2016
Baluni Public School,Talla Motadakh   *Bijnor,Uttarpradesh*

Projects

E-commerce (LINK)| *MongoDB,Express,React,Node.js*   **May 2023 - July 2023**

- E-commerce full stack web application,where users can create their account and wishlist their item.
- Authenticate users via email and password and allows user to add an item in shopping cart to make a purchase.
- Added **Payment integration,Cart functionality,Content Management System(Strapi) and Authorisation feature** for fetching the items.
- Utilized **cloudinary API for image storage** and used **JsonWebToken for authentication.**

Instagram Post Sharing (LINK) | *MongoDB,Express,React,Node.js,GraphQL*   **Sep. 2023 - Dec 2023**

- Instagram post sharing Full stack web application,where users can create their account and post pictures.
- Authentic users via email and password and allows users to post pictures,follow and unfollow others,and may type comments in the comment section.
- Used middleware to execute tasks such as **authentication verification, error handling, and request logging,** which occur between receiving a request and sending a response.

Zomato App Clone (LINK) | *HTML,CSS,Javascript,React.js,Redux*   **January 2024**

- Implementan intuitive user interface, featuring dynamic restaurant listings, detailed menu displays with images, and a seamless order processing system.
- Use visual indicators icons, colors to represent different stages of the order and feature like processing, out for delivery, delivered.
- Integrated firebase authentication for user sign-in,sign-out and allowing users to search for restaurants, browse menus,and enhance food discovery experience based on the number of stars.
- Provide real-time features, such as live order tracking and notifications, to enhance the user experience.

Weather Application (LINK) | *HTML,CSS,Bootstrap,API*

- Worked on **HTML,CSS,Javascript,React.js** and **RestfulAPI's** confidential.
- Weather application that allows user to search any city's temperature,humidity and wind information.
- Created a user-interface, retrieving weather data and adding interactive functionality that displays current weather conditions for any location.

Technical Skills

Languages: Java, Python, JavaScript, HTML/CSS, Bootstrap
Frameworks: React.js, Express.js, GatsbyJS, AJAX, Node.js, Docker
Developer Tools: Git, Github, Version Control,SASS, AWS, GraphQL, Micro-Services
Libraries: pandas, NumPy, Matplotlib, jQuery
Database: SQL, Monogodb, Cloud Databse
